A triple inducing torsion Z/2×Z/6

Problèmes ouverts — A. Dujella · 2026

Problem 3.8 (Dujella, 2026). Is there any Diophantine triple $\{a, b, c\}$ such that the elliptic curve $y^2 = (ax + 1)(bx + 1)(cx + 1)$ has torsion group $\mathbb{Z}/2\mathbb{Z} \times \mathbb{Z}/6\mathbb{Z}$?
