Regularity of D(4)-quadruples

Problèmes ouverts — A. Dujella · 2026

Problem 4.7 (Dujella, 2026). Are all $D(4)$-quadruples regular ?

Remark. A positive answer to Problem 4.7 would imply a positive answer to Problem 4.6, while a negative answer to Problem 4.6 would imply a negative answer to Problem 4.7. Namely, $\{a, b, c, d\}$ is a regular Diophantine quadruple if and only if $\{2a, 2b, 2c, 2d\}$ is a regular $D(4)$-quadruple.
