Monochromatic triangles

Animath — Stage olympique de Sophia-Antipolis · 2006 · France

---

Consider 18 points in the plane, 6 red, 6 green, 6 blue, no three collinear. Let $\mathcal{A}$ be the sum of the areas of the triangles formed by these points, and $\mathcal{B}$ the sum for the monochromatic triangles. Show that $4\mathcal{B} \leq \mathcal{A}$.
