Median and bisector

Animath — Stage olympique de Sophia-Antipolis · 2006 · France

---

Let ABC be a triangle with $AB > BC$. Let M and L be the points of (AC) such that (BM) is a median of the triangle and (BL) a bisector. The parallel to (AB) (resp. (BC)) through M (resp. L) meets (BL) (resp. (BM)) at D (resp. E). Show that (ED) is perpendicular to (BL).
