Three collinear points

Animath — Stage olympique de Sophia-Antipolis · 2006 · France

---

Let ABC be a triangle and D a point of (BC) such that B, C, D are collinear in this order and $CD = CA$. The circumcircle of ACD meets the circle with diameter $[BC]$ at P, and (BP) (resp. (CP)) meets (AC) (resp. (AB)) at E (resp. F). Show that D, E and F are collinear.
