The number read by Samuel

Animath — Stage olympique de Sophia-Antipolis · 2006 · France

Two positive integers are written on the board. In turn, each trainee comes to the board, looks at the two numbers a and b, notes that a is the smaller one, and replaces it by $\frac{ab}{b-a}$. Unfortunately, when Samuel's turn comes, he cannot note that a is the smaller number : the two numbers are equal. Show that the number read by Samuel is an integer.
