# Absolute bound for rational tuples

Problèmes ouverts — A. Dujella · 2026

---

**Problem 3.4 (Dujella, 2026).** Give an explicit absolute bound for the size of rational Diophantine tuples (assuming some plausible conjectures).

*Remark.* Lang's conjecture on varieties of general type implies an absolute bound for the size of rational Diophantine tuples, but it does not give an effective numerical bound in the form desired here.
