Coloring Proofs — problem 2.29

A. Engel — Problem-Solving Strategies · 1998

Each element of a 25×25 matrix is either $+1$ or -1. Let a_i be the product of all elements of the ith row and b_j be the product of all elements of the jth column. Prove that $a_1+b_1+\cdots+a_{25}+b_{25} \neq 0$.
