Functional Equations — problem 11.40

A. Engel — Problem-Solving Strategies · 1998

Find all functions $f : \mathbb{N}_0 \mapsto \mathbb{N}_0$, such that

$$f[m + f(n)] = f[f(m)] + f(n) \quad \text{for all } m, n \in \mathbb{N}_0 \qquad \text{(IMO 1996)}.$$
