f(m + f(n)) = n + f(m + 4)

Animath — Stage olympique de Sophia-Antipolis · 2006 · France

---

Consider the functional equation $f(m+f(n)) = n+f(m+4)$. Show that it has a unique solution $f : \mathbb{N}^* \to \mathbb{N}^*$ and find the value of $f(1) + f(2) + \cdots + f(59)$.
