Rebuilding an erased triangle

Animath — Stage olympique de Sophia-Antipolis · 2006 · France

---

François drew a triangle ABC on the board and constructed three equilateral triangles BCD, CAE and ABF outside it. However, during the chalk fight, Samuel accidentally erased all the lines as well as the points A, B and C ; only the points D, E and F remain. How can François reconstruct the points A, B and C with ruler and compass from what is left on the board ?
