

Rank 4 with torsion $\mathbb{Z}/2 \times \mathbb{Z}/8$

Problèmes ouverts — A. Dujella · 2026

Problem 2.2 (Dujella, 2026). Is there an elliptic curve over $\mathbb{Q}$ with torsion group $\mathbb{Z}/2\mathbb{Z} \times \mathbb{Z}/8\mathbb{Z}$ and rank equal to 4?

Remark. There are 34 known curves with torsion group $\mathbb{Z}/2\mathbb{Z} \times \mathbb{Z}/8\mathbb{Z}$ and rank equal to 3 :
