

# Regularity of $D(4)$ -quadruples

Problèmes ouverts — A. Dujella · 2026

---

**Problem 4.7 (Dujella, 2026).** Are all  $D(4)$ -quadruples regular?

*Remark.* A positive answer to Problem 4.7 would imply a positive answer to Problem 4.6, while a negative answer to Problem 4.6 would imply a negative answer to Problem 4.7. Namely,  $\{a, b, c, d\}$  is a regular Diophantine quadruple if and only if  $\{2a, 2b, 2c, 2d\}$  is a regular  $D(4)$ -quadruple.
