

One quadruple for three values of n

Problèmes ouverts — A. Dujella · 2026

Problem 5.14 (Dujella, 2026). Is there a set of four non-zero integers which is a $D(n_1)$ -, a $D(n_2)$ -, and a $D(n_3)$ -quadruple for three distinct non-zero integers n_1, n_2, n_3 ?
