Transformation Geometry — problem 12.2.15

A. Engel — Problem-Solving Strategies · 1998

In a quadrilateral $ABCD$, we reflect A at B to A_1, B at C to B_1, C at D to C_1, D at A to D_1. Suppose, only A_1, B_1, C_1, D_1 are given. Reconstruct $ABCD$. Compare the areas of $ABCD$ and $A_1B_1C_1D_1$.
