Harder Geometrical Problems — problem 12.3.2.51

A. Engel — Problem-Solving Strategies · 1998

In $\triangle ABC$, the bisectors of α, β, γ meet the circumcircle in A_1, B_1, C_1. Prove that $|AA_1| + |BB_1| + |CC_1| > |AB| + |BC| + |CA|$ (AuMO 1982).
