Further Strategies — problem 14.20

A. Engel — Problem-Solving Strategies · 1998

Starting with $1, 9, 9, 3$, we construct the sequence $1, 9, 9, 3, 2, 3, 7, \ldots$, where each new digit is the mod 10 sum of the preceding four terms. Will the 4-tuple $7, 3, 6, 7$ ever occur ?
